SMC is a soft polyester plate reinforced with special glass fiber, which is polymerized between the appropriate molds at high temperature and pressure. This is how it achieves its final form and the following unique characteristics:

- constant durability and quality
- it is half the weight of cast marble trays, which otherwise have similar features
- the rear-side ribbing reinforces the structure of the tray without adding considerable weight

- extremely impact-resistant
- has high compressive, flexural and tensile strength
- does not crack
- has unique thermal stability (no thermal expansion)
- chemically resistant
- good thermal insulation capacity
- easy to clean

A modern bathroom vanity featuring two black, counter-top porcelain basins. Each basin is paired with a tall, black, square-based faucet. The vanity is white with a glossy finish and has two drawers with long, horizontal silver handles. On the countertop, there is a double cup holder with two white cups and three toothbrushes. A large, rectangular mirror is mounted on the wall above the vanity. The wall is covered in white subway tiles, and the floor is made of light-colored wood-look planks. A window is visible in the background, letting in natural light.

Wellis hydromassage bath tubs

When designing WELLIS hydromassage systems, we focus on offering a wide product – range from basic models to the most modern hydro-massage systems. Our goal is to ensure that each customer finds the system that fits their needs best; the system that will offer the comfort necessary after an exhausting day.

E-Drive™ Touch felszereltségen felül:

- water temperature control system
- FM radio
- exclusive colour therapy lighting:
12-20 pcs LED lights on the side of the tub

HYDROMASSAGE SYSTEM PROPERTIES

Wellis V-Concept™ back massage system

The secret of the Wellis V-Concept™ back massage system – developed by massage therapists and engineers – lies in the size and position of the jets. While in the most widely used system, the water stream, flowing out of 1 or 2 back massage jets, hits the spine directly, the smaller-sized Wellis V-Concept™ jets – due to their positioning – massage the back muscles along the spine, resulting in a faster and more effective massage experience.

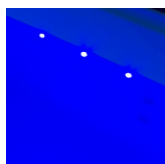

Silent™ hot tub motor

Each bathtub with hot tub system is equipped with SILENT™ motor. In order to provide the best massage experience, we managed to reduce the noise level of the hot tub motor to under 60dB. A further positive characteristic of the product is that it is capable of circulating 200 litres of air per minute.

Wellis slim jet

Its most noticeable characteristic is the aesthetic design of the new SLIM jets and inlet, and that they protrude from the tub surface by only 1.5 mm, while the hydromassage jets used by other manufacturers may protrude by as much as 15-20 mm. With this new innovation, we can ensure carefree enjoyment of perfect relaxation. You can rest assured that protruding jets will not cause discomfort. Thanks to its unique design, tubs equipped with the hydromassage system are outstanding not only in terms of comfort, but design as well.

Exclusive colour therapy lighting

Lighting is built into the sidewall of the tub, directly under the water surface, consisting of 12-20 LEDs that are aligned with the standard underwater colour therapy lighting installed in the tub.

Standard on E-Max™ Touch and E-Drive™ Touch massage systems.

Tube drying system

Tube drying system – which is available from the E-Drive equipment – offers extra advantage for our hot tubs, since it blows 99% of stagnant water out of the tubes. Thus, there is no need to worry that bacteria and other contaminants – stuck to the tube sides – enter our bodies.

It is turned on about 10 minutes after the hot tub is stopped, and is automatically operated for the same period to dry out the tubes.

It is standard equipment on E-Max™ Touch and E-Drive™ Touch massage systems.

Malawi

HYDROMASSAGE TUB

170 × 75 × 60 cm - 190 l

Our Malawi tub is best characterized by sophistication and straight design. It is a perfect choice for those who like traditional tubs, but it can also be a stylish accessory in a modern bathroom. The top quality acrylic bath tub may be important for bathers longing for peaceful moments and relaxation. Those equipped with a hot tub pump have an airflow capacity of 200 litres per minute — providing a magical and carefree relaxation experience.

Arezzo white

FREESTANDING BATHTUB

180 × 87 × 65 cm - 190 l

An ideal bathroom not only offers maximum comfort for the entire family, but its look strives for perfection as well. You can avoid weighing these advantages: choose our free-standing Arezzo tub, which offers comfort and looks equally. After all, in addition to the stability provided by the double wall acrylic tub body to the entire structure, the special form really attracts attention to our model.

- double wall, dirt-resistant acrylic bath tub body
- drain and overflow grid + drain trap
- hidden levelling feet

*Faucet is not included in the price.

Arezzo black

FREESTANDING BATHTUB

180 × 87 × 65 cm - 190 l

The black version of our Arezzo model. If a modern look is really important to you, and you would like your free-standing tub to be absolutely dominant and to receive special attention, choose our Arezzo black model. Stability, long-term usability, spacious design and unique form — all in one product!

- double wall, dirt-resistant acrylic bath tub body
- drain and overflow grid + drain trap
- hidden levelling feet

*Faucet is not included in the price.

We offer a 10-year warranty for tub body.

Calabria white

FREESTANDING BATHTUB

170 × 80 × 58 cm - 270 l

When designing our Calabria product, we followed the principles of simplicity and greatness. That is, when choosing a freestanding tub, the decision is often based on the look, and there are serious doubts regarding usability. In the case of Wellis freestanding tubs, comfort plays an important role in designing the models. Due to the corner design of the freestanding Calabria model, it will look very good in a small bathroom, but since its straight side is completely covered, it can be also placed in freestanding position.

- double wall, dirt-resistant acrylic bath tub body
- drain and overflow grid + drain trap
- hidden levelling feet
- can be pushed against the wall

*Faucet is not included in the price.

Calabria black

FREESTANDING BATHTUB

170 × 80 × 58 cm - 270 l

Our Calabria black model combines extra modern look with the grace of simplicity. The black acrylic adds modernity to even traditional bathrooms, so being immediately eye-catching is unavoidable. The Calabria model will look amazing even in a very small bathroom!

- double wall, dirt-resistant acrylic bath tub body
- drain and overflow grid + drain trap
- hidden levelling feet
- can be pushed against the wall

*Faucet is not included in the price.

Sierra

FREESTANDING BATHTUB

170 × 80 × 72 cm - 290 l

Thanks to the romantic design of the Sierra tub, it can easily turn out to be the highlight of your bathroom. Position it anywhere you wish, and enjoy its features right away. Its modern design and sleek forms make this product truly unforgettable.

- double wall, dirt-resistant acrylic bath tub body
- acrylic layer thickness: 4-5 mm
- drain and overflow grid + drain trap
- hidden levelling feet

*Faucet is not included in the price.

Gloria

FREESTANDING BATHTUB

Ø138 × 58 cm - 360 l

Gloria freestanding bathtub for lovers of round shapes! The spacious use and the amazing look of our Gloria model will immediately sweep you off your feet. Noble simplicity as a highlighted part of an extra modern bathroom! Order a fabulous matching freestanding faucet, and you can start your all-night relaxation!

- double wall, dirt-resistant acrylic bath tub body
- acrylic layer thickness: 4-5 mm
- drain and overflow grid + drain trap
- hidden levelling feet

*Faucet is not included in the price.

We offer a 10-year warranty for tub body.

Flavia

FREESTANDING BATHTUB

170 × 80 × 60 cm - 330 l

The double-walled, dirt-resistant, 5 mm thick acrylic bath tub body of the Flavia model offers stability and durability. Because of the design and comfort solutions offered by the hidden levelling feet and ITS unique lines, you will gladly choose Flavia for your home!

- double wall, dirt-resistant acrylic bath tub body
- acrylic layer thickness: 4-5 mm
- drain and overflow grid + drain trap
- hidden levelling feet

*Faucet is not included in the price.

Alassio

FREESTANDING BATHTUB

170 × 80 × 58 cm - 210 l

Each freestanding tub will make your bathroom unique and add special atmosphere. This tub is primarily recommended to those passionate for romantic design. Classic, elegant design makes it really special, and attracts attention to our Alassio tub. Order a matching freestanding faucet, and slip into the Alassio tub.

- double wall, dirt-resistant acrylic bath tub body
- acrylic layer thickness: 4-5 mm
- drain and overflow grid + drain trap
- hidden levelling feet

*Faucet is not included in the price.

Porcelain basins

In our range of porcelain sinks, counter-top porcelain sink models with elegant slim rim design are offered, as well as the more practical wall-mounted sinks — which also serve well without a sink cabinet in rooms with a small floor area.

For our counter-top porcelain sinks, choose an elevated faucet from our broadening range, and we also recommend to purchase our click-clack drains — available with or without overflow — with the top in chrome or black porcelain.

RIMLESS TOILET

The most important feature of rimless toilets is that there are no unreachable areas, so they can easily be kept clean.

Precisely designed shape – the toilet bowl's special design ensures that water will swirl around on the inside without splashing, and clean the entire inner surface.

SOFT-CLOSE

Nowadays, there's a basic requirement that a toilet seat should close softly, without outside intervention.

On this issue, we won't compromise either, so each of our toilet seats is equipped with this technology.

QUICK RELEASE

Wellis toilet seats are equipped with the Quick Release easy removal system. In addition to quick installation, this solution also makes cleaning much easier, since the seat can be removed without fiddling with the hinges, at the push of a button – and it can then be replaced just as simply.

SLIM SEAT

Each toilet seat perfectly fits the respective toilet bowl. The Clement collection's extra thin Slim seat provides an elegant look.

2 FLUSH volumes 4/6 l

Each of our mono-block toilets are available with a 4-6 liter choice of flushing volumes to help save precious water

HIDDEN HINGES

Both wall-mounted and floor-standing Wellis toilets are equipped with hidden hinges. There is only one tiny attachment point visible on the surface of the sanitary product. In addition to the aesthetic aspects, it also ensures easy and more hygienic cleaning.

Toilet tank

CORSICA/CORSICA BLACK

TOILET TANK OUTSIDE THE WALL FOR FLOOR-STANDING & WALL-MOUNTED TOILETS

48.3 × 10.8 × 100.3 cm

- safety glass front cover in white or black

- without faucet and wall connecting pipe
- with installation set and sealant

Lipari

What is meant by smart Toilet? One might think that it is only a simple toilet, with built-in bidet function. Although it is true in part, there is much more to it. Smart toilets provide complete comfort for the smallest room: the lid opens automatically when the built-in sensor detects movement. The pre-heating function ensures a constant comfortable temperature for the seat. Jet strength and water temperature can be adjusted as needed. A discreet night light helps sleepy family members to find their way at night. And it performs all functions saving water and energy.

LIPARI WALL-MOUNTED RIMLESS SMART TOILET

39 × 59 × 35 cm

- porcelain
- bidet function
- women's intimate washer
- child wash
